Dear Colleagues,

It is a great pleasure for us to organize the 15th International Course & Workshop on Advanced Laparoscopic Urology in Cluj Napoca.

The very generous idea of organizing such training sessions for our young fellows supported by the pharmaceutical and medical industry was born inside the Heilbronn Club, an international community of friends who learned laparoscopic urology from Professor Jens Rassweiler, in Heilbronn, Germany.

Joining a fellowship program is actually the right and safe way of learning a difficult surgical technique so that the trainee will have the chance to follow the beginning of the learning curve alongside an experienced surgeon. Being a fellow in Heilbronn is an unique experience: a very friendly environment together with the other fellows, a very permissive practical training program combined with the feeling of having one of the best laparoscopist in the world on your side. All these ingredients have the magical power of bringing out the best in everyone that joins the program. In order to extend the atmosphere from the Heilbronn fellowship program we try to organize these courses in each of our hometowns, so that the young generation will have the chance to get in touch with the magnificent laparoscopic urology.

Why Cluj Napoca? Maybe it is fate, but maybe it is because more than 15 years ago Professor Ioan COMAN, together with a team of general surgeons, started the first urological laparoscopic operations in our country. And also maybe because he did not stop there, but gathered around him a team of young doctors who carried on his passion for this amazing field: laparoscopic urology.

I wish you all the best and a very productive time in Cluj Napoca!

Dr. Bogdan Petruț
